

Enrique García Cota

Project Manager at Splendeo Innovación

Madrid, Spain
(+34) 666901806
egarcia@splendeo.es

Profile Summary

Client-facing skills / Project management skills / Global scale projects (different timezones, outsourcing)

Strong technical background, specialty on web-based projects.

Native Spanish, nearly bilingual English, and fluent French. Working experience on the 3 languages.

Education

Real Time Major on the *Institut Supérieur d'Électronique de Paris (ISEP)* – February 2002

Computer Science Degree on the University of Seville – September 2003

Working Experience

Colgate & CERN - Development Lead

May 2009 - present

Splendeo

Technical lead on a web application company. Most recent projects were two projects developed for Colgate-Palmolive (www.e-storemonitor.com) and the CERN (www.ohwr.org).

- Facilitating business requests (new project and change requests) from initial opening through to the creation of **functional specifications** and **contracts**.
- Working with clients to determine their **business requirements**, while reporting and **tracking project costs**
- Providing insight into best way to achieve desired functionality, including assessment of **time and cost impacts**
- Managing **multiple projects at once**; across multiple brands and geographical regions.
- Technologies employed: Ruby on Rails, Drupal, AJAX

Diageo Eservices - Solution Manager European Lead

July 2007 - April 2009

Accenture

The Solution Manager is involved in the delivery of projects and change requests for the websites that Accenture builds. In detail, the roles and responsibilities include:

- Functional Specifications and Contracts
- Business requirements and project costs.
- Acting as liaison between development team and the business
- Providing **technical project management** status, including status reports, issue logs, change control logs
- Sample work: **www.johnnieWalker.com**, **www.baileys.com**, including all international versions.

Technologies employed: Microsoft Sharepoint.

"In addition Enrique moved to the the position of European Solution Manager Lead on the last quarter of 2008. This involved looking after a team of 2 other Solution Managers based in London and Dublin. He provided pastoral care and looked after progress/status of the team; as well as had involvement in wider engagement tasks and issues."

Carrefour - Requirements gathering team leader

March 2007 - June 2007

Accenture

I directed a team of 4 people in gathering and documenting requirements for new application.

The main language used on this project was French.

The project required management of a small team, quick learning of the business requirements as well

as direct contact with the Client.

Diageo - Application development and maintenance

October 2005 - June 2007

Accenture

Maintenance and improvement of 2 web applications used for time reporting and cost control.

- Design and implementation of new reports, as well as improvement of existing ones. The timing and budgetary information appearing on those reports was then used by management.
- **C# , server javascript, SQL + IIS.**

Accenture - Other Assignments

Feb. 2004 - August 2005

Accenture

I've worked on several other assignments in Accenture, including

- Writing documentation about a Siebel installation.
- Working on the PMO office of a complex (+600 people) project.
- Managing the network of that same project.
- Updating roles by using the SAP Security Module.
- Automating several procedures by using Excel + VBA.

Kondor+/TradeKast - Development Internship

Feb 2002 - July 2002

Reuters Financial Software

As part of my studies in Paris, I made an internship re-developing some parts of a database import/export library in order to increase its maintainability.

- **Intensive C/C++ programming**
- Developing of a new database binding language
- The working environment's language was French, but documents were written in English.

Snecma Moteurs - Development Internship

Sept. 2001 - January 2002

Snecma Moteurs/ISEP

Join project between the ISEP (*Institut Supérieur d'Électronique de Paris*) and SNECMA Moteurs. The project consisted in the study of the viability of an airplane engine's digital control system.

- Network Protocol analysis (Firewire, USB) / Real-time operative systems (QNX, Linux RT) / C prototype

Training/Continuing Education

Several trainings completed while in Accenture, on subjects including **methodology, decision making** and **leadership**.

Skills

| | |
|-------------------|---|
| Expert | MS Office, Software Development, Expectations & Project Management, Reporting HTML, Javascript, Ruby on Rails, VBA, SQL, C, C++ |
| Advanced | Negotiation, Team management, Client-facing skills , Outsourcing projects SQL, SQL Server, PostgreSQL, ISS, Apache, CSS , Linux, MS Windows, Prototype.js, jQuery, SEO, MS MOSS (Sharepoint) |
